Manufacturing our future

Job title: Demand Planner

Location: Estaimpuis Central Offices

We are looking for a new member to the S&OP Demand Planning team.

Your responsibilities will be:

You are responsible for the demand planning which is to ensure an accurate forecast to Supply Chain by systematically challenging historical data and key account input.

Your main tasks are to:

- Manage the forecasting tool by reviewing alerts raised by the system, review poor statistical forecast, make recommendations to the APO Configuration Manager.
- Prepare a monthly forecast review, integrated with trends of the month.
- Organise meetings with Account Management and PLM (related to events & promotions) to discuss the gap analysis and deviations and to capture all demand: meetings, regular reporting, master data creation....
- Challenge the forecast
- Communicate and explain relevant analyses and reporting to Account Management
- Communicate decisions as an outcome of meetings with Account Management to all relevant parties.
- Make forecast information available, on time & in the right level of detail
- Monitor performance of Key Account Management & PLM on forecasting

Your profile:

- Master degree in Economics or any other relevant discipline is preferred (BAC+4 or +5). You may hold the equivalent level by experience.
- Prior experience in the area of manufacturing planning, preferably in PL industry or in FMCG is considered a plus.
- Very good knowledge in English and French is required. Knowledge of Dutch or any other European language is a plus.
- PC-skills: very good knowledge of Excel is required. Knowledge of SAP and APO is an asset.
- You are a structured thinker with a passion for numbers and an analytical mind.
- You are conscientious and have some project management skills.
- You have good verbal and written skills.
- You are persuasive and dynamic person with a positive and can-do attitude.

What will you receive as of your first day at the job:

- You will be given a challenging, fast paced and international environment
- You will join a great team !
